

I would like to share how wonderful Sunsmile toothpaste is.

I have been seeing my dentist here in Bozeman, Mt. for about four years now.

He had to do dental work (mostly fillings) in the past three years. He wanted to do some grafting on the bottom of my mouth each year. I was told about how Sunsmile helped a member of my family (my Mom) not have as much plaque buildup between visits a year ago. I decided to try it. My first six month check up after I started I did not have to have any extra work done. I just finished seeing the dentist for the second time, and he was real pleased on how little plaque there was. He also said he wants to wait now on the grafting.

I am so pleased with our wonderful products that Sunrider provides for us.
